MUHAMMAD **UMER** FAROOQ

Software Developer

ABOUT

Hi there, I'm a Software Developer. I love building and rebuilding open-source products.

I have experience in Full Stack software development, including Web, Mobile applications, Desktop applications, web scraping, web crawling, and API integrations, working on many projects. Beside all these I am also interested in deep learning, algorithm implementation, kernel, compilers, computer vision and Cryptography.

PROJECTS

ALPHASOFTHUB ↗
I started my own business, AlphaSoftHub (Private) Limited, on February 12, 2021. In this role, I serve as the lead developer for the company's various projects.

RESOURCER ↗
I developed an app that offers a platform for students at Riphah University to share and access study resources.

ZEST FRAMEWORK ↗
Zest is a PHP MVC framework designed for rapid application development, particularly for small to medium scale apps and APIs. It offers a simple, yet powerful solution for creating efficient and scalable applications.

ALUMNI MANAGEMENT SYSTEM ↗
Riphah International University offered me the opportunity to work on building an alumni management system for Riphah International University. The university will use this system to manage and connect with its alumni. I was excited to take on the project and help the university strengthen its relationship with its graduates.

COVID-19 DASHBOARD AND PARSER ↗
The Super-Fast COVID-19 Dashboard and parser is a tool designed to develop awareness among the public about the pandemic by visualizing data in a way that is easy for everyone to understand. It also serves as a resource for researchers and individuals looking to gather information for their own experiences and studies.

FREELANCING ↗
As a freelancer, I have had the privilege of working on a wide range of fascinating projects. This has allowed me to gain a wealth of experience and expertise in various fields, and has given me the opportunity to work with clients from all over the world. Overall, my experiences as a freelancer have been incredibly rewarding, and I have enjoyed the flexibility and autonomy that comes with this type of work.

November 2022,
I have been supervising Umer for over six months on a large scale/complex web application project, during this time he has proven himself to be hardworking, tasks oriented and adaptable to stressful conditions. Umer's approach to software development is very mature and he has the special ability to convert complex tasks into the simpler ones. I found him devoted to his work and always keen to continue his intellectual growth. I have no doubt he can prove himself as a valuable asset for any team.
